Career Objective

I am a passionate MERN Stack Developer focused on building clean, efficient, and scalable web applications. With a strong dedication to learning and problem-solving, I constantly try to improve my skills in modern frontend technologies and backend API development.
My long-term goal is to grow into a **Senior Front-End Developer** and eventually become a **Full-Stack Developer**, specializing in modern UI/UX, system design, and production-grade applications.

Skill Summary:
Frontend: HTML, CSS, Tailwind CSS, JavaScript (Functions, Arrays, Objects, Classes, ES6+ Features), React.js (UI Development)
Backend: Node.js (Server-side), Express.js (RESTful API Development)
Database: MongoDB (NoSQL Database Management)

Recent Projects:

1. EduManage – Full MERN Stack Educational Platform Live Link | Client |Server

A MERN stack educational platform with multi-role dashboards, secure authentication, and class management.

Key Features:
- Multi-role access (Student, Teacher, Admin)
- Class approval, enrollment & payment
- Assignment creation & submission, feedback system
- Dashboard analytics, responsive UI

2. WhereIsIt - Lost & Found Web Application Live Link | Client | Server

A Lost & Found platform where users can report, browse, and recover items with secure login.

Key Features:
- User authentication with JWT & Google Sign-In
- Add, update, delete, and track lost/found items
- Conditional actions for recovered items (“Found This” / “This is Mine”)
- Responsive UI with search/filter functionality

Bengali (Native): Fluent in speaking, reading, and writing
English (Intermediate): Proficient in reading and writing, conversational in speaking
